

Please do not change the "No Call" rule concerning telemarketers in Indiana. I was getting between 5-8 calls a day from these people and sometimes 2 from the same company (with different people) a day!!! I don't believe that these people and companies have a "right" to invade my privacy via my telephone. This rule/law has eliminated most of these calls, especially around suppertime and on the weekends. Multiply this by 2 as we have two different phones in our house and we were getting all kinds of calls. We pay for our phone service and I don't feel that gives companies/individuals the "right" to abuse what we as consumers pay for and pay taxes on to boot. Chuck McConnell.
